Admission rate is the percent of applicants who were admitted.

Enrollment rate is the percent of admitted applicants who enrolled.

Enrollment Data – Definitions

Headcount: Each student enrolled in one or more credit-bearing courses at a particular college, at the specified time during the semester, counts as one headcount for that college. Students who are matriculated at another VSC college, and are enrolled at the college in question, are included in the count in the latter college. Students who are matriculated at that college but are attending a different VSC college are not included in this count. Students may be counted more than once system-wide if they are enrolled in classes in more than one college in a given semester.

Unduplicated count: Students who are taking classes at more than one VSC institutions are included in the headcounts of both colleges. The total VSCS numbers however are unduplicated, counting each student only once. Therefore, the unduplicated figures for VSCS do not equal the sum of the college headcounts.

Full-Time: Any student registered for greater than or equal to the full-time credit load for a college and academic level is considered a full-time student. For students enrolled at more than one VSC college all their credits are considered in the calculation of credit load. Full-time credit load depends on the academic level of the student. Generally, 12 credits is considered full-time at the undergraduate level while 6 credits is considered full-time at the graduate level.

Part-Time: Any student registered for less than the full-time credit load for a college and academic level is considered a part-time student. For students enrolled at more than one VSC college, their total credits across the system are considered in the calculation of credit load. A part-time credit load depends on the academic level of the student. Undergraduate students taking less than 12 credits, and graduate students taking less than 6 credits are considered to be enrolled part time.

In-State: Any student identified as a Vermont resident for the purposes of admission. It is expected that the residency status of a student remains as it was when the student was admitted to the college, unless the student appeals for a change in status. For non-matriculated students, those who establish that they are Vermont residents according to definitions set by the business office are considered to be in-state students.

Out-of-State: Any student identified as a non-Vermont resident, for the purposes of admission. For non-matriculated students, out-of-state students are those who reside outside Vermont, or who have not lived in Vermont long enough to establish residency according to the college definition.

FTE: The number of full-time equivalent (FTE) students was calculated based on the fall student headcount.

In previous years, students enrolled on full-time basis accounted for one FTE each, whereas to calculate the full-time equivalent for students enrolled on part-time basis, we would divide the sum of the credits carried by part-time students by the corresponding full-time credit load (12 credits for undergraduate students and 6 credits for graduate students). The final FTE student count was the sum of the full-time students and the number of full-time equivalent students as calculated above.

Starting in Fall 2018, to calculate the number of full-time equivalent students, we aggregate the credit load of all students, by level, and divide with the appropriate full-time load (12 credits for undergraduate students and 6 credits for graduate students).

Matriculated: A matriculated student is one who has formally applied and been accepted to a VSC college and is working toward a degree or certificate. Students must be matriculated to apply for financial aid, to be eligible for scholarships, to be assigned an advisor, and to be awarded a degree or diploma.

Non-matriculated students are those who are taking courses for personal enrichment or are trying out college before applying for admission.

*VSCS count is unduplicated.

This report contains a headcount of all students enrolled at each of the VSC institutions on the official Fall reporting date of October 15th. Students who are taking classes at more than one institution are included in the headcounts of all institutions they are taking classes in.

The total VSC numbers however are unduplicated, with each student counted once. The resulting unduplicated headcount figures for the VSC therefore do not equal the sum of the college headcounts.

In addition, while for individual colleges the full- or part-time status of a student is assessed based on their enrollment at that institution, the VSCS-level counts consider the student's enrollment across the VSCS to determine the student's full-time or part-time status.

*VSCS count is unduplicated.

This report contains an FTE count of all students enrolled at each of the VSC institutions on the official reporting date of October 15. Students who are taking classes at more than one institution are included in the FTE counts of all institutions they are taking classes in. The total VSC figures are calculated based on the total number of credits students take, across the VSC.

Before fall 2018, students enrolled on full-time basis accounted for one FTE each, whereas to calculate the full-time equivalent for students enrolled on part-time basis, we would divide the sum of the credits carried by part-time students by the corresponding full-time credit load (12 credits for undergraduate students and 6 credits for graduate students). The final FTE student count was the sum of the full-time students and the number of full-time equivalent students as calculated above.

Starting in fall 2018, to calculate the number of full-time equivalent students, we aggregate the credit load of all students, by level, and divide with the appropriate full-time load (12 credits for undergraduate students and 6 credits for graduate students).

In addition, while for individual colleges the full- or part-time status of a student is assessed based on their enrollment at that institution, the VSCS-level counts consider the student's enrollment across the VSCS to determine the student's full-time or part-time status.

Student Information:
Academic Program Enrollment

Academic Program Enrollment

This report summarizes the enrollment by academic degree program of students at the specified VSC college on October 15th, 2020. Unlike the enrollment by headcount reports that count each student enrolled in at least one credit bearing class at the institution, this report counts all students who have an academic program at the college even if they are enrolled exclusively at another VSC institution in the fall term.

Additionally, it does not count students who have an academic program at another institution but are taking one or more classes at this college. Thus, the headcount in this report may vary slightly from the Official Headcount Report for the same date.

The headcount of students in a specific major, and the columns that follow, are based only on the current "declared program" for the student. The numbers include only one degree and one major per student.

Student Information:
Student Costs

Student Costs - Definitions

Fiscal Year: The consecutive twelve-month period for which an institution plans the use of its funds, designated by the year in which the fiscal year ends. The VSC fiscal year runs from July 1 to June 30 of the next calendar year.

For enrollment purposes, the fiscal year comprises the Summer, Fall, and Spring terms.

Student Information:
Financial Aid & Student Debt

Financial Aid - Definitions

Institutional grants or scholarships: Grants, scholarships, and fellowships granted and funded by the institution and/or individual departments within the institution and are limited to students attending the institution. It includes scholarships targeted to certain individuals (e.g., based on state of residence, major, or participation in athletic activities) for which the institution designates the recipient; it also includes institutional tuition and fee waivers for which your institution was not reimbursed by a state or local government agency.

State & local grants: Grants that were awarded by the state; it includes merit-based grants or scholarships that were provided by the state or local government. It also includes tuition and fee waivers for which your institution was reimbursed by a state or local government agency.

Federal Grant Aid: Grants provided by federal agencies such as the U.S. Department of Education, including Title IV Pell Grants and Supplemental Educational Opportunity Grants (SEOG). It also includes need-based and merit-based educational assistance funds and training vouchers provided from other federal agencies and/or federally sponsored educational benefits programs.

Other Grant Aid: Gift and grant aid provided by or through the college, but generally from outside sources.

Federal direct subsidized loan: A subsidized loan is one that is based on financial need, and for which the student will not be charged any interest either before they begin repayment or during authorized periods of deferment. The federal government "subsidizes" the interest during these periods.

Federal direct unsubsidized loan: An unsubsidized loan is not awarded on the basis of need and as such the interest rate is not subsidized by the federal government. The student will be charged interest from the time the loan is disbursed until it is paid in full.

Note: The financial aid information contained in the next pages refers to the total financial aid given to either all undergraduate or to full-time first-time degree-seeking undergraduate students that enrolled in the fall, over the respective academic year; i.e. it does not include financial aid given over the academic year to students that were not enrolled in the fall.

Student Information: Graduation & Retention

Graduation & Retention - Definitions

Graduation rates reported next are those calculated by the IPEDS Graduation Rate Survey for each of the reporting years noted. The graduation rate measures the rate at which the "cohort" of first-time, full-time, degree seeking students entering in a particular year, graduates from the same institution within 150% of the normal time to completion (four years for bachelor's degrees, two years for associate's degrees). In addition, Certificate programs are counted as completions in this calculation.

For the most recent report cycle, the cohort was comprised of students entering in 2014 for CU, NVU and VTC, and in 2017 for CCV.

First-Time Students: Students with no prior postsecondary experience attending any institution for the first time at the undergraduate level. It includes students who attended college for the first time in the prior summer term, and student who earned college credits before graduating from high school.

Graduation Rate: The percentage of first-time, full-time students who graduate within 150% of the time that is normally required to complete the program they were in.

Retention Rate: For four-year institutions, the percentage of first-time bachelor's degree-seeking undergraduate students from the previous fall term, who enroll again in the most recent fall term, or the percentage of degree/certificate-seeking students from the previous fall term who either re-enrolled or successfully completed their program by the most recent fall term.

Note regarding Retention and Graduation Rates at CCV:

It is important to recognize that traditional measures of retention and graduation for first-time, full-time, degree-seeking students capture only a small fraction of CCV's overall enrollment and mission.

First-time, full-time, degree-seeking students enrolled at CCV in fall 2016, for example, represented only 3% of CCV's total enrollment. Of these students, 8% were still enrolled in fall 2019, 16% had graduated, and 24% had transferred on to another postsecondary institution, representing a combined persistence rate of 48%.

Student Information: Completions

Student Outcomes - Definitions

Certificates: Completion of an academic program that requires less than 60 credits to complete. In many cases certificate programs prepare the student for a particular type of career. Many of the VSC certificate programs are offered by the Community College of Vermont and the Vermont Technical College.

Associate Degrees: These programs require a minimum of 60 credits.

Baccalaureate Degrees: These academic programs require a minimum of 120 academic credits.

Graduate Degrees: The only graduate degrees awarded at the VSC are Master's degrees.

CIP Codes: The Classification of Instructional Program (CIP) 2010 is developed and maintained by NCES, the National Center for Educational Statistics, and the U.S. Department of Education, and provides a taxonomy with which to accurately track and report fields of study and program completions. CIP codes are the accepted federal government standard for instructional program classification and are used in a variety of education surveys and databases.

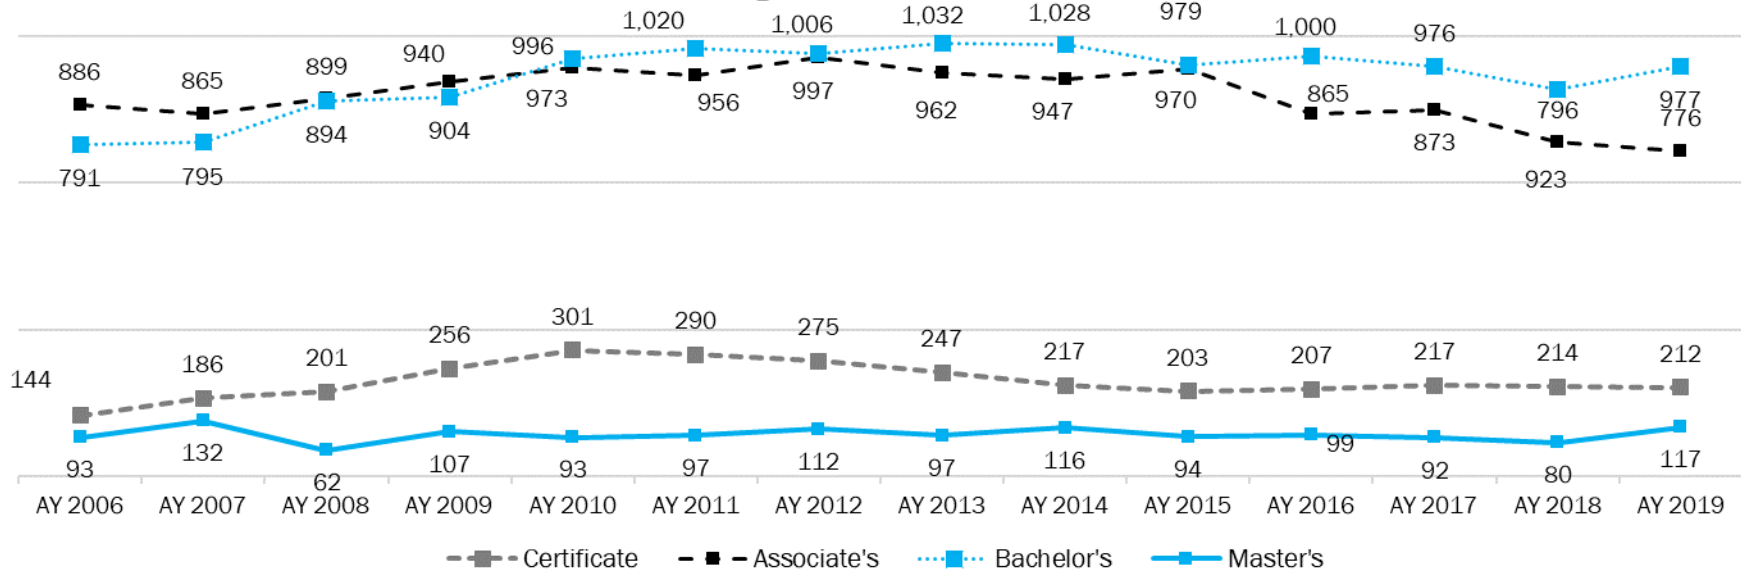

Academic Year: The period of time that is defined by a school to measure a generally accepted quantity of study. At the Vermont State Colleges an academic year consists of both the fall and following spring semesters. When the summer semester is included in the academic year, the summer preceding the fall semester is a part of the same academic year.

*Prior to 2018/19 academic year, NVU figures are composite, representing the sum of awards in NVU-J and NVU-L.

VSCS Degree & Certificate Awards

Number of Completers by Award Level & Residency Fall 2013-Spring 2020

Note that the tables below exhibit the number of students who were awarded a degree or certificate and who were positively identified as VT residents at the time of the award; some students' residency status was unknown at the time of the award.

Because some students were awarded more than one degree/certificate, and those students are reported under each award category, the sum of completers by category can be higher than the total number of completers.

Note that because some students were awarded more than one degree/certificate, and those students are reported under each award category, the sum of completers by category can be higher than the total number of completers.

VSCS Employees

VSCS Employees - Definitions

This report includes the active employees of VSCS on November 1, 2020. Employees with more than one position at a given college are counted only once, based on their primary position. Therefore, some administrators that also teach a class are not included in the count of part-time faculty. Student employees are not included at all.

The employee counts for VTC does not include CEWD, VMEC and SBDC workers.

Active Employees by Bargaining Unit
